Clinical and Experimental Pharmacology and Physiology (2003) **30**, 975–985

SUBJECT INDEX

absorption; characteristics of UGT substrate selectivity 836
Abstracts
  Abstracts of the Annual Scientific Meeting of the Australian Atherosclerosis Society (AAS) and the Joint Symposium of the AAS and the Australian Vascular Biology Socieyty at the Australian Health and Medical Research Congress A1
  Abstracts of the Annual Scientific Meeting of the High Blood Pressure Research Council of Australia Inc. A31
ACE *see* angiotensin-converting enzyme
acetylcholine; indomethacin in hypercholesterolaemic rabbits 405
acidosis; HBO_2 reduces NO in LPS-induced shock rats 482
actin and myosin filament polarity; force–MrATPase relationship in muscle 570
action potential duration; cardiomyopathy and sarcoplasmic reticulum 232
active avoidance response; histamine H_1 receptor antagonists and memory 60
active metabolism; cardiac energetics: sense and nonsense 598
activin A; activin and TR3 in atherogenesis 894
acyl-coenzyme A : cholesterol acyltransferase; Kabosu juice precipitate lowers cholesterol 532
adenosine
  adenosine inhibits N-type calcium channels 174
  ischaemic preconditioning and adenosine 350
  pyruvate-mediated protection 145
  tissue injury modulation in renal ischaemia 242
adenosine A_1 receptors; adenosine inhibits N-type calcium channels 174
adenovirus; activin and TR3 in atherogenesis 894
adenylyl cyclase; G-proteins in opiate dependence (Brief Review) 307
adrenergic vasoconstriction; cotransmission in reserpinized vessels 452
α_1-adrenoceptor
  cotransmission in dog gastroepiploic artery 678
  hypochlorite and the cardiovascular system 249
  preweaning doxazosin and SHR blood pressure (Short Communication) 555
α_{1A}-adrenoceptor antagonists; tocolytic effect on pregnant rat uterus 164
α_2-adrenoceptors; intrathecal conotoxins and dexmedetomidine 82
β-adrenoceptor agonists; science and physicianly practice 833
β_2-adrenoceptor agonists; tocolytic effect on pregnant rat uterus 164
aerobic physical exercise; physical exercise and membrane fluidity 382
affinity chromatography; affinity HPLC for rat glycated haemoglobin 752
ageing; *Centella asiatica* in i.c.v. streptozotocin 336
ageing physiology; hypertension and autonomic activity 419
airway smooth muscle; biomechanical enhancement of proliferation 324
airway wall remodelling; biomechanical enhancement of proliferation 324
aldosterone; ketorolac and cold pressor pain 739
aldosterone synthase; extra-adrenal production of corticosteroids (Brief Review) 437
Alzheimer's disease; *Centella asiatica* in i.c.v. streptozotocin 336
amphetamine; prepulse inhibition in rat strains 254
anaerobic energy supply; anoxia and smooth muscle contraction 565
analgesia; kinetics of a liposomal bupivacaine in mice (Short Communication) 966
Angelica keiskei extract; *Angelica keiskei* and lipid metabolism 284
angiogenesis
  in vitro effects of steroids on haemangioma 140
  stem cell-derived cells 900
angiotensin
  AngII in cardiac hypertrophy and remodelling (Brief Review) 911
  neurocardiovascular regulation in mice 885
angiotensin II
  dual RAS inhibition in SHR 317
  LOX/COX and regional kidney perfusion 812
  no ET_A effect on cardiac hypertrophy 278
  swimming stress increases non-endothelial NO 951
angiotensin-converting enzyme inhibitor
  ACE inhibition/renal filtration surface area 72
  dual RAS inhibition in SHR 317
animal models; prepulse inhibition in rat strains 254
anococcygeus muscle (rat); copper and *S*-nitrosothiols 357
ANP *see* atrial natriuretic peptide
antihypertensive agents; antihypertensives in atherosclerosis 779
anti-oxidants
  training and redox–force relationship 77
anti-oxidant enzymes; anti-oxidant enzymes and lipid peroxidation 185
antisense RNA; RNAi may be more potent than antisense RNA 96
antisense treatment; truncated p75NTR-mediated death after axotomy 217
antivenom; neuromuscular activity of snake venoms 127
aortic arch; reinnervation in SAD rats 925
aortic collagen; effect of *C. indica* on collagen in diabetes 157
apolipoproteins
  Angelica keiskei and lipid metabolism 284
  Kabosu juice precipitate lowers cholesterol 532
apolipoprotein E; taurine reducesSHL mice atherosclerosis 295
apomorphine; prepulse inhibition in rat strains 254
apoptosis
  apoptosis in SAD rats 362
  oxLDL and Fas-mediated apoptosis 289
applanation tonometry; hypercholestrolaemia and platelet function (Special Article) 507
arachidonic acid; increase in K^+ current by MAPK inhibitors 273

L-arginine; NO in PMA-induced acute lung injury 393
arginine amidase activity; sites of release of arginine amidase activity (Short Communication) 501
arrythmias; insulin resistance and cardiac ishaemia 446
arterial baroreflex
  apoptosis in SAD rats 362
  intrathecal conotoxins and dexmedetomidine 82
  ketanserin stabilizes blood pressure 189
  reinnervation in SAD rats 925
arteries; vascular and renal structure in hypertension 476
arteriogenesis; stem cell-derived cells 900
arterioles; introduction of peptides into smooth muscle 653
arterosclerosis; biochemical parameters of SHHR 537
artery; swimming stress increases non-endothelial NO 951
asthma
  biomechanical enhancement of proliferation 324
  science and physicianly practice 833
AT_1 receptor; AngII in cardiac hypertrophy and remodelling (Brief Review) 911
AT_1 receptor antagonist
  AngII in cardiac hypertrophy and remodelling (Brief Review) 911
  dual RAS inhibition in SHR 317
AT_2 receptor; AngII in cardiac hypertrophy and remodelling (Brief Review) 911
AT_2 receptor antagonist; AngII in cardiac hypertrophy and remodelling (Brief Review) 911
atherogenic lipid profile; *P. osteratus* improve hypercholesterolaemia 470
atherosclerosis
  activin and TR3 in atherogenesis 894
  antihypertensives in atherosclerosis 779
  vascular isoforms of NADPH oxidase 849
ATP
  alteration effect of ATP by high glucose 694
  extracellular ATP degradation blood vessels 194
  P2 purinoceptors in guinea-pig uterine vasculature 329
ATP-binding cassette (ABC) transporters; dietary phytosterol and stroke in SHRSP 919
atrial natriuretic peptide
  ANP and cardiac hypertrophy 343
  proANP (1–30) in hypertension 627
atrial natriuretic peptide gene; *Nppa* and *Nppb* genes in SHR and WKY rats 930
atrial tachyarrhythmia; PACAP-induced atrial tachyarrhythmia 937
autonomic activity; hypertension and autonomic activity 419
autonomic nervous system
  extracellular ATP degradation blood vessels 194
  PACAP-induced atrial tachyarrhythmia 937
autoradiography; CBF and metabolism in a hypoperfusion model 266
axotomy; truncated p75NTR-mediated death after axotomy 217

baroreceptor reflex; neurocardiovascular regulation in mice 885
baroreflex sensitivity; hypertension and autonomic activity 419
basal cardiac metabolism; ouabain-stimulated cardiac basal metabolism 103
basal metabolism; cardiac energetics: sense and nonsense 598
behaviour; intracerebral microdialysis (Brief Review) 16
benzodiazepines; BZ and EtOH-induced gastric damage *in vitro* 495
bilateral subthalamic stimulation; experimental therapeutics of Parkinsonism 841
bile flow; peppermint oil and valerian on the liver 799
bioenergetics; heart, mitochondria and lifespan 590
bisoxonol; effect of TMP on potassium channels 793
bis-phenol; regulation of ion transport by bis-phenolics 623
blood pressure
  dietary phytosterol and stroke in SHRSP 919
  dual RAS inhibition in SHR 317
  ketanserin stabilizes blood pressure 189
  kidney function in cross-fostered GH rats 820
  neurotrophins in axonal growth and guidance 769
  vascular and renal structure in hypertension 476
blood pressure variability
  apoptosis in SAD rats 362
  hypertension and autonomic activity 419
  ketanserin stabilizes blood pressure 189
body size; memebranes as metabolic pacemakers 559
bodyweight; neurotrophins in axonal growth and guidance 769
Book Review 117, 300, 805, 909
bovine; biomechanical enhancement of proliferation 324
bradykinin; ACE inhibition/renal filtration surface area 72
brain; extra-adrenal production of corticosteroids (Brief Review) 437
brain natriuretic peptide gene; *Nppa* and *Nppb* genes in SHR and WKY rats 930
B-type natriuretic peptide
  BNP half-life in dogs 369
  LV remodeling in haemodialysis patients 786
bupivacaine; kinetics of a liposomal bupivacaine in mice (Short Communication) 966
BZ *see* benzodiazepines

Ca^{2+}-ATPase; cardiomyopathy and sarcoplasmic reticulum 232
Ca^{2+} channel pore; structure of RyR Ca^{2+} channels (Brief Review) 713
caffeine; effect of caffeine on SHRSP striated muscle 223
calcium
  alteration effect of ATP by high glucose 694
  effects of OVX and E2 replacement on $[Ca^{2+}]_i$ 489
  perfusing the mouse heart 867
calcium channels; adenosine inhibits N-type calcium channels 174
cAMP
  alteration effect of ATP by high glucose 694
  cGMP protein kinase and myocytes 940
cancer gene therapy; RNAi may be more potent than antisense RNA 96
canine gastroepiploic artery; cotransmission in dog gastroepiploic artery 678
canine splenic artery; cotransmission in reserpinized vessels 452
cardiac arrest; ouabain-stimulated cardiac basal metabolism 103
cardiac basal metabolism; responses of $\dot{V}_{O_2}$ to $[Ca^{2+}]_i$ 586
cardiac energetics; cardiac energetics: sense and nonsense 598

cardiac function
ANP and cardiac hypertrophy 343
postischaemic heart failure in the mouse 25
cardiac glycosides; ouabain-stimulated cardiac basal metabolism 103
cardiac hormones; proANP (1–30) in hypertension 627
cardiac hypertrophy
AngII in cardiac hypertrophy and remodelling (Brief Review) 911
ANP and cardiac hypertrophy 343
dual RAS inhibition in SHR 317
losartan on cardiac gene expression 827
no ET_A effect on cardiac hypertrophy 278
cardiac muscle models; cardiac energetics: sense and nonsense 598
cardiac myocyte
cGMP protein kinase and myocytes 940
heart cell volume and delayed rectifier I_K 616
effects of OVX and E2 replacement on $[Ca^{2+}]_i$ 489
cardiac remodelling; AngII in cardiac hypertrophy and remodelling (Brief Review) 911
cardiomyocyte; cardiac hypertrophy (Brief Review) 517
cardiomyopathy; cardiomyopathy and sarcoplasmic reticulum 232
cardioplegic arrest; heat shock proteins and cardioprotection 110
cardiovascular system; phenotypic analysis of transgenic mice (Brief Review) 207
carotid artery ligation; activin and TR3 in atherogenesis 894
carotid sinus; reinnervation in SAD rats 925
catalase; oxygen radicals and gastric mucosal lesions 545
catechins
taurine reducesSHL mice atherosclerosis 295
vasoconstrictor effect of catechins 88
CBF *see* cerebral blood flow
cDNA microarray; losartan on cardiac gene expression 827
cell injury; direct vascular effects of HR780 958
cell volume; heart cell volume and delayed rectifier I_K 616
Centella asiatica; *Centella asiatica* in i.c.v. streptozotocin 336
cerebral blood flow, regional; CBF and metabolism in a hypoperfusion model 266
cerebral circulation; NADPH-oxidase in the cerebral circulation 855
cerebral glucose utilization, regional; CBF and metabolism in a hypoperfusion model 266
cerebral ischaemia
effect of *Withania somnifera* in stroke 399
effects of α-tocopherol and mannitol 745
magnolol protects against heatstroke injury 387
cetirizine; histamine H_1 receptor antagonists and memory 60
cGMP; cGMP protein kinase and myocytes 940
cGMP protein kinase; cGMP protein kinase and myocytes 940
CGS 9896; BZ and EtOH-induced gastric damage *in vitro* 495
choline; choline potentiates Gly-Gln and naloxone 640
cholinergic system; choline potentiates Gly-Gln and naloxone 640
clearance; BNP half-life in dogs 369
clonazepam; BZ and EtOH-induced gastric damage *in vitro* 495
Coccinia indica; effect of *C. indica* on collagen in diabetes 157
cold stress; vascular and renal structure in hypertension 476
collagen; biomechanical enhancement of proliferation 324
collecting duct; ENaC and water and salt intake in Sabra rats (Short Communication) 963
colonocyte; regulation of ion transport by bis-phenolics 623
Commentary 116
confocal microscopy; peppermint oil and valerian on the liver 799
congestive heart failure; LV remodeling in haemodialysis patients 786
ω-conotoxins; intrathecal conotoxins and dexmedetomidine 82
contractile cycling; mouse perfused heart 879
contractile properties; chronic hypoxia on contractile properties 551
contractile response; muscarinic receptors of rat ileum 168
copper; copper and *S*-nitrosothiols 357
copper chelators; copper and *S*-nitrosothiols 357
copperhead; neuromuscular activity of snake venoms 127
coronary artery disease; gender, sex hormones and vascular tone (Brief Review) 1
COX *see* cyclo-oxygenase
cross-bridge formation; force–MrATPase relationship in muscle 570
cross-bridge turnover; anoxia and smooth muscle contraction 565
cross-fostering; kidney function in cross-fostered GH rats 820
cross-linking; effect of *C. indica* on collagen in diabetes 157
cross-sectional area; cigarette smoke and muscle fibre profile 671
cultured vascular smooth muscle cells; effect of TMP on potassium channels 793
cuprizone; copper and *S*-nitrosothiols 357
cyclo-oxygenase; LOX/COX and regional kidney perfusion 812
cyclo-oxygenase inhibitor; indomethacin in hypercholesterolaemic rabbits 405
cylopiazonic acid; cardiomyopathy and sarcoplasmic reticulum 232
cytochrome P450; CYP-mediated hydroxylation of tamoxifen 845
cytokines; effects of a-tocopherol and mannitol 745

db/db mice; affinity HPLC for rat glycated haemoglobin 752
death signalling; truncated p75NTR-mediated death after axotomy 217
delayed outward rectifying K^+ current; increase in K^+ current by MAPK inhibitors 273
delayed rectifier K^+ current; heart cell volume and delayed rectifier I_K 616
dependence; G-proteins in opiate dependence (Brief Review) 307
depressor peptide; Val-Tyr depressor activity 262
dermatan sulphate; sites of release of arginine amidase activity (Short Communication) 501
development; memebranes as metabolic pacemakers 559
dexamethasone
biomechanical enhancement of proliferation 324
renal function after prenatal dexamethasone 32
diabetes; affinity HPLC for rat glycated haemoglobin 752
diabetes mellitus; LV remodeling in haemodialysis patients 786
diabetic rats; effect of *C. indica* on collagen in diabetes 157
diaphragm; chronic hypoxia on contractile properties 551
diazoxide; IPC and pharmacological preconditioning 684

diethylenetriamine nitric oxide adduct; DETA/NO relaxes mouse tracheal smooth muscle 709
differentiation; stem cell-derived cells 900
1,25-dihydroxyvitamin D_3; effects of calcitrol on the immune system (Brief Review) 807
distribution; characteristics of UGT substrate selectivity 836
dopamine; prepulse inhibition in rat strains 254
double actin filament overlap; force–MrATPase relationship in muscle 570
doxorubicin; anti-oxidant enzymes and lipid peroxidation 185
dry powder; pulmonary disposition of liposomal ketotifen 153

E2 *see* oestradiol
eccentric exercise; force-matching errors after exercise 576
echocardiography
  ANP and cardiac hypertrophy 343
  postischaemic heart failure in the mouse 25
ecto-nucleotidases; extracellular ATP degradation blood vessels 194
ectothermy; memebranes as metabolic pacemakers 559
effective refractoriness; PACAP-induced atrial tachyarrhythmia 937
electric field stimulation; tocolytic effect on pregnant rat uterus 164
electroencephalography; intracerebral microdialysis (Brief Review) 16
electron paramagnetic resonance; physical exercise and membrane fluidity 382
ENaC *see* epithelial sodium channel
endothelial cell
  direct vascular effects of HR780 958
  NO, human diseases and herbal products (Brief Review) 605
  sites of release of arginine amidase activity (Short Communication) 501
  P2Y regulates endothelium permeation 649
endothelial nitric oxide synthase; eNOS in pre-eclampsia 376
endothelial progenitor cell
  ox-LDL on progenitor cell differentiation 665
  stem cell-derived cells 900
endothelin; endothelin and obesity 702
endothelin-1
  LOX/COX and regional kidney perfusion 812
  no ET_A effect on cardiac hypertrophy 278
endothelium
  antihypertensives in atherosclerosis 779
  gender, sex hormones and vascular tone (Brief Review) 1
  hypochlorite and the cardiovascular system 249
  indomethacin in hypercholesterolaemic rabbits 405
  swimming stress increases non-endothelial NO 951
endothermy
  heart, mitochondria and lifespan 590
  memebranes as metabolic pacemakers 559
endotoxaemia; HBO_2 reduces NO in LPS-induced shock rats 482
end-stage renal disease; LV remodeling in haemodialysis patients 786
energetics; cardiac energetics: from E_{max} to PVA 580
energy metabolism; effects of GIK solution on glucose uptake 64
eNOS *see* endothelial nitric oxide synthase
epinastine; histamine H_1 receptor antagonists and memory 60
epithelial sodium channel; ENaC and water and salt intake in Sabra rats (Short Communication) 963
erythrocytes; physical exercise and membrane fluidity 382
essential hypertension; physical exercise and membrane fluidity 382
ethanol
  BZ and EtOH-induced gastric damage *in vitro* 495
  food and alcohol intake and NO metabolites (Short Communication) 504
etheno-nucleotides; extracellular ATP degradation blood vessels 194
excitation–contraction coupling; effect of caffeine on SHRSP striated muscle 223
excretion (ADME); characteristics of UGT substrate selectivity 836
exercise; training and redox–force relationship77
extensor digitorum longus muscle; cigarette smoke and muscle fibre profile 671
extracellular Na^+; responses of $\dot{V}O_2$ to $[Ca^{2+}]_i$ 586

Fas; oxLDL and Fas-mediated apoptosis 289
Fas ligand; oxLDL and Fas-mediated apoptosis 289
fatigue
  chronic hypoxia on contractile properties 551
  force-matching errors after exercise 576
fatty acids; insulin resistance and cardiac ishaemia 446
fetal development; renal function after prenatal dexamethasone 32
fibre type distribution; cigarette smoke and muscle fibre profile 671
flavonoids; NO, human diseases and herbal products (Brief Review) 605
flumazenil; BZ and EtOH-induced gastric damage *in vitro* 495
fluorescence; effect of *C. indica* on collagen in diabetes 157
food; food and alcohol intake and NO metabolites (Short Communication) 504
food deprivation; neurotrophins in axonal growth and guidance 769
force maintenance; anoxia and smooth muscle contraction 565
force–length relationship; force–MrATPase relationship in muscle 570
free radicals
  effects of α-tocopherol and mannitol 745
  magnolol protects against heatstroke injury 387
  NADPH-oxidase in the cerebral circulation 855
frequency–response; perfusing the mouse heart 867
fucoxanthin; effect of Wakame on the development of stroke 44
Fura-2; effect of TMP on potassium channels 793
fura-2 fluorescence
  ouabain-stimulated cardiac basal metabolism 103
  responses of $\dot{V}O_2$ to $[Ca^{2+}]_i$ 586

gastric damage; BZ and EtOH-induced gastric damage *in vitro* 495
gastric mucosal lesions; oxygen radicals and gastric mucosal lesions 545
gender; effects of OVX and E2 replacement on $[Ca^{2+}]_i$ 489
gene expression
  effects of oestrogen on glucose in HepG2 cells 643
  losartan on cardiac gene expression 827

gene transfer; neurocardiovascular regulation in mice 885
genetic hypertension; AngII and pressure–natriuresis 413
genetically hypertensive rat; kidney function in cross-fostered GH rats 820
genetics; stress response in congenic rats 464
genotype; CYP-mediated hydroxylation of tamoxifen 845
GH rat *see* genetically hypertensive rat
GIK solution *see* glucose–insulin–potassium solution
ginseng; NO, human diseases and herbal products (Brief Review) 605
glomerular filtration rate; kidney function in cross-fostered GH rats 820
glomerulonephritis; effects of calcitrol on the immune system (Brief Review) 807
glomerulus
  ACE inhibition/renal filtration surface area 72
  vascular and renal structure in hypertension 476
glucocorticoids
  biomechanical enhancement of proliferation 324
  extra-adrenal production of corticosteroids (Brief Review) 437
  in vitro effects of steroids on haemangioma 140
gluconeogenesis; effect of 6-OHDA on renal gluconeogenesis 55
glucose
  alteration effect of ATP by high glucose 694
  effects of oestrogen on glucose in HepG2 cells 643
glucose–insulin–potassium solution; effects of GIK solution on glucose uptake 64
GLUT-4; μ-opioid receptor and glucose in diabetes 734
glutamate; prepulse inhibition in rat strains 254
glycated haemoglobin; affinity HPLC for rat glycated haemoglobin 752
glycolysis; effects of GIK solution on glucose uptake 64
glycyl-glutamine; choline potentiates Gly-Gln and naloxone 640
Gly-Gln; choline potentiates Gly-Gln and naloxone 640
gp91phox; vascular isoforms of NADPH oxidase 849
G-proteins; G-proteins in opiate dependence (Brief Review) 307
granulocytosis; hypoxia increases $\cdot O_2^-$ in neutrophils 659
growth; cardiac hypertrophy (Brief Review) 517
growth factors; *in vitro* effects of steroids on haemangioma 140
GTN *see* nitroglycerine
guinea-pig; heart cell volume and delayed rectifier I_K 616
guinea-pig vasculature; biomechanical enhancement of proliferation 324

haemangioma; *in vitro* effects of steroids on haemangioma 140
haemodialysis; LV remodeling in haemodialysis patients 786
haemorrhage
  choline potentiates Gly-Gln and naloxone 640
  intrathecal conotoxins and dexmedetomidine 82
HBO_2 *see* hyperbaric O_2
heart
  cardiac energetics: from E_{max} to PVA 580
  cardiac hypertrophy (Brief Review) 517
  extra-adrenal production of corticosteroids (Brief Review) 437
  heart, mitochondria and lifespan 590
  heat shock proteins and cardioprotection 110
  insulin resistance and cardiac ishaemia 446
heart rate variability; hypertension and autonomic activity 419
heat production; anoxia and smooth muscle contraction 565
heat shock proteins; heat shock proteins and cardioprotection 110
heat stroke
  effects of α-tocopherol and mannitol 745
  magnolol protects against heatstroke injury 387
hemiparkinsonian rats and marmosets; experimental therapeutics of Parkinsonism 841
hepatoma; RNAi may be more potent than antisense RNA 96
hepatoma cells; peppermint oil and valerian on the liver 799
high-density lipoprotein subfractions; Kabosu juice precipitate lowers cholesterol 532
histamine H_1 receptor antagonists, second-generation; histamine H_1 receptor antagonists and memory 60
homing; stem cell-derived cells 900
HPLC; affinity HPLC for rat glycated haemoglobin 752
HR780; direct vascular effects of HR780 958
human; intracerebral microdialysis (Brief Review) 16
human colon; NK_2 receptors in human colon and bladder 632
human urinary bladder; NK_2 receptors in human colon and bladder 632
human ventricular myocardium; cardiomyopathy and sarcoplasmic reticulum 232
hydrogen peroxide
  hypochlorite and the cardiovascular system 249
  NADPH-oxidase in the cerebral circulation 855
  vasoconstrictor effect of catechins 88
6-hydroxydopamine
  effect of 6-OHDA on renal gluconeogenesis 55
  experimental therapeutics of Parkinsonism 841
11β-hydroxylase; extra-adrenal production of corticosteroids (Brief Review) 437
3-hydroxy-3-methylglutaryl coenzyme A reductase inhibitor; direct vascular effects of HR780 958
Z-4-hydroxy-tamoxifen; CYP-mediated hydroxylation of tamoxifen 845
5-hydroxytryptamine
  GTN in arteriopathic popliteal rings 528
  tachykinins, 5-HT and intestinal secretion 764
hyperbaric O_2; HBO_2 reduces NO in LPS-induced shock rats 482
hypercholesterolaemia
  antihypertensives in atherosclerosis 779
  hypercholestrolaemia and platelet function (Special Article) 507
  P. osteratus improve hypercholesterolaemia 470
hyperlipidaemia; biochemical parameters of SHHR 537
hyperosmolality; hyperosmolality and Na^+–H^+ exchange 178
hypertension
  ACE inhibition/renal filtration surface area 72
  biochemical parameters of SHHR 537
  ENaC and water and salt intake in Sabra rats (Short Communication) 963
  gender, sex hormones and vascular tone (Brief Review) 1
  ketanserin stabilizes blood pressure 189
  NADPH-oxidase in the cerebral circulation 855
  preweaning doxazosin and SHR blood pressure (Short Communication) 555

proANP (1–30) in hypertension 627
stress response in congenic rats 464
Val-Tyr depressor activity 262
vascular and renal structure in hypertension 476
see also blood pressure
hypertensive transgenic mouse; Val-Tyr depressor activity 262
hypertrophy; cardiac hypertrophy (Brief Review) 517
hypobaric hypoxia; chronic hypoxia on contractile properties 551
hypochlorite; hypochlorite and the cardiovascular system 249
hypotension
choline potentiates Gly-Gln and naloxone 640
HBO_2 reduces NO in LPS-induced shock rats 482
see also blood pressure

ileum; tachykinins, 5-HT and intestinal secretion 764
immune system; effects of calcitrol on the immune system (Brief Review) 807
immunohistochemistry; eNOS in pre-eclampsia 376
in vitro
BZ and EtOH-induced gastric damage *in vitro* 495
in vitro effects of steroids on haemangioma 140
inbred rats; biochemical parameters of SHHR 537
Indian herb; effect of *Withania somnifera* in stroke 399
indomethacin; indomethacin in hypercholesterolaemic rabbits 405
inducible nitric oxide synthase; HBO_2 reduces NO in LPS-induced shock rats 482
inflammation
NO, human diseases and herbal products (Brief Review) 605
vascular redox-sensitive signalling by AngII 860
inhalation; pulmonary disposition of liposomal ketotifen 153
inhaled corticosteroids; science and physicianly practice 833
insulin; effects of oestrogen on glucose in HepG2 cells 643
insulin resistance; insulin resistance and cardiac ishaemia 446
integrative analysis; cardiac energetics: from E_{max} to PVA 580
intermittent hypobaric hypoxia; hypoxia increases $\cdot O_2^-$ in neutrophils 659
intracellular Ca^{2+}
effect of TMP on potassium channels 793
ouabain-stimulated cardiac basal metabolism 103
P2Y regulates endothelium permeation 649
responses of $\dot{V}O_2$ to $[Ca^{2+}]_i$ 586
intracerebral perfusion; intracerebral microdialysis (Brief Review) 16
intravenous glucose challenge test; μ-opioid receptor and glucose in diabetes 734
inward rectifying K^+ current; increase in K^+ current by MAPK inhibitors 273
ion transport; regulation of ion transport by bis-phenolics 623
IPC *see* ischaemic preconditioning
ischaemia
heat shock proteins and cardioprotection 110
insulin resistance and cardiac ishaemia 446
ischaemic preconditioning and adenosine 350
pyruvate-mediated protection 145
ischaemia–reperfusion
mouse perfused heart 879
tissue injury modulation in renal ischaemia 242
ischaemic injury; intracerebral microdialysis (Brief Review) 16
ischaemic preconditioning
IPC and pharmacological preconditioning 684
ischaemic preconditioning and adenosine 350
mitochondrial K_{ATP} channels and PKC 426
isolated cardiomyocytes; ischaemic preconditioning and adenosine 350
isolated muscle; chronic hypoxia on contractile properties 551
isoprostane; indomethacin in hypercholesterolaemic rabbits 405

jejunum; tachykinins, 5-HT and intestinal secretion 764

Kabosu juice precipitate; Kabosu juice precipitate lowers cholesterol 532
KCl; GTN in arteriopathic popliteal rings 528
ketanserin; ketanserin stabilizes blood pressure 189
ketotifen; histamine H_1 receptor antagonists and memory 60
ketotifen fumarate; pulmonary disposition of liposomal ketotifen 153
kidney
alteration effect of ATP by high glucose 694
AngII and pressure–natriuresis 413
kidney medulla; LOX/COX and regional kidney perfusion 812
kinetics; kinetics of a liposomal bupivacaine in mice (Short Communication) 966
KKA^y mice; affinity HPLC for rat glycated haemoglobin 752

laminin; biomechanical enhancement of proliferation 324
Langendorff perfusion
mouse perfused heart 879
perfusing the mouse heart 867
learning and memory
Centella asiatica in i.c.v. streptozotocin 336
histamine H_1 receptor antagonists and memory 60
left rat atrium; hypochlorite and the cardiovascular system 249
left ventricular hypertrophy; LV remodeling in haemodialysis patients 786
left ventricular morphology; postischaemic heart failure in the mouse 25

noradrenaline; LOX/COX and regional kidney perfusion 812
NO_x; HBO_2 reduces NO in LPS-induced shock rats 482
Nox1; vascular isoforms of NADPH oxidase 849
Nox4; vascular isoforms of NADPH oxidase 849
nuclear receptor; activin and TR3 in atherogenesis 894

obesity; endothelin and obesity 702
Obituary; Archie McIntyre 303
oesophageal striated muscle; effect of caffeine on SHRSP striated muscle 223
oestradiol
biomechanical enhancement of proliferation 324
effects of oestrogen on glucose in HepG2 cells 643
effects of OVX and E2 replacement on $[Ca^{2+}]_i$ 489
oestrogen; effects of OVX and E2 replacement on $[Ca^{2+}]_i$ 489
olopatadine; histamine H_1 receptor antagonists and memory 60
6-OHDA *see* 6-hydroxydopamine
opioid; choline potentiates Gly-Gln and naloxone 640
opioid receptor; G-proteins in opiate dependence (Brief Review) 307
osmolality; heart cell volume and delayed rectifier I_K 616
osmotic pressure; renal medullary hypertonicity (Brief Review) 119
osteoblasts; science and physicianly practice 833
ouabain; regulation of ion transport by bis-phenolics 623
ovariectomy; effects of OVX and E2 replacement on $[Ca^{2+}]_i$ 489
OVX *see* ovariectomy
oxidative stress; *Centella asiatica* in i.c.v. streptozotocin 336
oxidized low-density lipoprotein
oxLDL and Fas-mediated apoptosis 289
ox-LDL on progenitor cell differentiation 665
oxLDL *see* oxidized low-density lipoprotein

P2 purinoceptor; biomechanical enhancement of proliferation 324
P2X receptor; cotransmission in dog gastroepiploic artery 678
P2Y receptor; P2Y regulates endothelium permeation 649
P388; anti-oxidant enzymes and lipid peroxidation 185
p75NTR-knockout mouse; truncated p75NTR-mediated death after axotomy 217
PACAP *see* pituitary adenylate cyclase-activating polypeptide
pain
force-matching errors after exercise 576
kinetics of a liposomal bupivacaine in mice (Short Communication) 966
pancreatic cancer; RNAi may be more potent than antisense RNA 96
paracellular infiltration; anti-metastatic effect of Wf-536 *in vitro* 457
paracellular permeability; anti-metastatic effect of Wf-536 *in vitro* 457
parasympathetic nervous system; neurocardiovascular regulation in mice 885
peppermint oil; peppermint oil and valerian on the liver 799
peptide inhibitors; introduction of peptides into smooth muscle 653
peptide vector; RNAi may be more potent than antisense RNA 96
peripheral occlusive arteriopathy; GTN in arteriopathic popliteal rings 528
permeability; P2Y regulates endothelium permeation 649
pharmacological preconditioning; IPC and pharmacological preconditioning 684
pharmacophore; characteristics of UGT substrate selectivity 836
phenolphthalein; regulation of ion transport by bis-phenolics 623
phorbol myristate acetate; NO in PMA-induced acute lung injury 393
phosphoenolpyruvate carboxykinase; μ-opioid receptor and glucose in diabetes 734

physiological determinants of myocardial oxygen consumption; cardiac energetics: sense and nonsense 598
phytosterol additives; dietary phytosterol and stroke in SHRSP 919
pioglitazone; affinity HPLC for rat glycated haemoglobin 752
pituitary adenylate cyclase-activating polypeptide; PACAP-induced atrial tachyarrhythmia 937
PKC *see* protein kinase C
placenta; eNOS in pre-eclampsia 376
plaque; indomethacin in hypercholesterolaemic rabbits 405
plasma sequestration; BNP half-life in dogs 369
platelets; hypercholestrolaemia and platelet function (Special Article) 507
pleural thickening; Na-hyaluronate and pleural thickening (Short Communication) 203
Pleurotus osteratus; *P. osteratus* improve hypercholesterolaemia 470
PMA *see* phorbol myristate acetate
polarized cells; regulation of ion transport by bis-phenolics 623
polyphenols; NO, human diseases and herbal products (Brief Review) 605
poplitea; GTN in arteriopathic popliteal rings 528
post-rest potentiation of contraction; cardiomyopathy and sarcoplasmic reticulum 232
postural abnormalities; experimental therapeutics of Parkinsonism 841
potassium channel blockers; effect of TMP on potassium channels 793
potassium ionic current; increase in K^+ current by MAPK inhibitors 273
preconditioning; pyruvate-mediated protection 145
prediabetic state; insulin resistance and cardiac ishaemia 446
pre-eclampsia; eNOS in pre-eclampsia 376
pregnancy; biomechanical enhancement of proliferation 324
prenatal glucocorticoids; renal function after prenatal dexamethasone 32
prepulse inhibition; prepulse inhibition in rat strains 254
pressoreceptors; neurocardiovascular regulation in mice 885
pressure natriuresis; renal medullary hypertonicity (Brief Review) 119
pressure overload; losartan on cardiac gene expression 827
pressure–volume area; cardiac energetics: from E_{max} to PVA 580
presynaptic; adenosine inhibits N-type calcium channels 174
proANP; proANP (1–30) in hypertension 627
proliferation; direct vascular effects of HR780 958
proprioception; force-matching errors after exercise 576
prostaglandin; indomethacin in hypercholesterolaemic rabbits 405
prostanoids; swimming stress increases non-endothelial NO 951
protein kinase C
  alteration effect of ATP by high glucose 694
  IPC and pharmacological preconditioning 684
  mitochondrial K_{ATP} channels and PKC 426
protein structure; structure of RyR Ca^{2+} channels (Brief Review) 713
protein transfection; introduction of peptides into smooth muscle 653
protein/protein interactions; structure of RyR Ca^{2+} channels (Brief Review) 713
pulmonary; pulmonary disposition of liposomal ketotifen 153
PVA *see* pressure–volume area
pyruvate; pyruvate-mediated protection 145

quantitative structure–activity relationship (QSAR); characteristics of UGT substrate selectivity 836
quantitative trait locus; *Nppa* and *Nppb* genes in SHR and WKY rats 930

rabbit
  cGMP protein kinase and myocytes 940
  antihypertensives in atherosclerosis 779
rabbit aorta; sites of release of arginine amidase activity (Short Communication) 501
rabbit ear artery; sites of release of arginine amidase activity (Short Communication) 501
radioligand binding; NK_2 receptors in human colon and bladder 632
radiotelemetry; neurotrophins in axonal growth and guidance 769
rat
  affinity HPLC for rat glycated haemoglobin 752
  BZ and EtOH-induced gastric damage *in vitro* 495
  effect of *Withania somnifera* in stroke 399
  insulin resistance and cardiac ishaemia 446
  oxygen radicals and gastric mucosal lesions 545
  tachykinins, 5-HT and intestinal secretion 764
  tocolytic effect on pregnant rat uterus 164
rat aorta; vasoconstrictor effect of catechins 88
rat caudal artery; P2Y regulates endothelium permeation 649
rat chronic hypoperfusion model; CBF and metabolism in a hypoperfusion model 266
rat heart
  hyperosmolality and Na^+–H^+ exchange 178
  ischaemic preconditioning and adenosine 350
rat myocytes; effects of GIK solution on glucose uptake 64
$^{86}Rb^+$ efflux; regulation of ion transport by bis-phenolics 623
reactive oxygen
  NADPH-oxidase in the cerebral circulation 855
  neurocardiovascular regulation in mice 885
  training and redox–force relationship77
  vascular redox-sensitive signalling by AngII 860
  vasoconstrictor effect of catechins 88
receptor pharmacology; intracerebral microdialysis (Brief Review) 16
reinnervation; reinnervation in SAD rats 925
releasable nucleotidases; extracellular ATP degradation blood vessels 194
remodelling
  LV remodeling in haemodialysis patients 786
  vascular redox-sensitive signalling by AngII 860
renal blood flow; kidney function in cross-fostered GH rats 820
renal circulation; LOX/COX and regional kidney perfusion 812
renal filtration surface area; ACE inhibition/renal filtration surface area 72
renal function
  kidney function in cross-fostered GH rats 820
  phenotypic analysis of transgenic mice (Brief Review) 207
  tissue injury modulation in renal ischaemia 242

renal haemodialysis; renal function after prenatal dexamethasone 32
renal medulla; renal medullary hypertonicity (Brief Review) 119
renal medullary blood flow; renal medullary hypertonicity (Brief Review) 119
renal medullary interstitium; renal medullary hypertonicity (Brief Review) 119
renal nerves; endothelin and obesity 702
renin–angiotensin system
AngII and pressure–natriuresis 413
AngII in cardiac hypertrophy and remodelling (Brief Review) 911
dual RAS inhibition in SHR 317
human; Val-Tyr depressor activity 262
resting metabolic rate; phenotypic analysis of transgenic mice (Brief Review) 207
retrodialysis; intracerebral microdialysis (Brief Review) 16
reverse permeabilization; introduction of peptides into smooth muscle 653
reverse transcription–polymerase chain reaction
Angelica keiskei and lipid metabolism 284
dietary phytosterol and stroke in SHRSP 919
rho; anti-metastatic effect of Wf-536 *in vitro* 457
Rho-associated coiled-coil forming protein serine/threonine kinase; anti-metastatic effect of Wf-536 *in vitro* 457
ribosomal gene transcription; cardiac hypertrophy (Brief Review) 517
ribosomes; cardiac hypertrophy (Brief Review) 517
RNA interference; RNAi may be more potent than antisense RNA 96
RNAi *see* RNA interference
Ro 15-4513; BZ and EtOH-induced gastric damage *in vitro* 495
Ro 5-3663; BZ and EtOH-induced gastric damage *in vitro* 495
ROCK
anti-metastatic effect of Wf-536 *in vitro* 457
see also Rho-associated coiled-coil forming protein serine/threonine kinase
ryanodine receptor; structure of RyR Ca^{2+} channels (Brief Review) 713

SAD *see* sinoaortic denervation
salt depletion; ANP and cardiac hypertrophy 343
sarcoplasmic reticulum
cardiomyopathy and sarcoplasmic reticulum 232
effect of caffeine on SHRSP striated muscle 223
[Sar^9,$Met(O_2)^{11}$]-SP; tachykinins, 5-HT and intestinal secretion 764
scaling; heart, mitochondria and lifespan 590
sex hormones; gender, sex hormones and vascular tone (Brief Review) 1
SHHR *see* spontaneously hypertensive hyperlipidaemic rats
SHL mice *see* spontaneously hyperlipidaemic mice
shortening velocity; anoxia and smooth muscle contraction 565
shrinkage temperature; effect of *C. indica* on collagen in diabetes 157
SHRSP *see* stroke-prone spontaneously hypertensive rats
signal transduction
gender, sex hormones and vascular tone (Brief Review) 1
introduction of peptides into smooth muscle 653
vascular redox-sensitive signalling by AngII 860
signalling; G-proteins in opiate dependence (Brief Review) 307
sinoaortic denervation
apoptosis in SAD rats 362
reinnervation in SAD rats 925
smooth muscle cell
activin and TR3 in atherogenesis 894
direct vascular effects of HR780 958
sodium excretion; kidney function in cross-fostered GH rats 820
sodium hyaluronic acid; Na-hyaluronate and pleural thickening (Short Communication) 203
sodium pump; memebranes as metabolic pacemakers 559
sodium transport; renal medullary hypertonicity (Brief Review) 119
soluble guanylyl cyclase; DETA/NO relaxes mouse tracheal smooth muscle 709
species difference; cardiac energetics: sense and nonsense 598
spectral analysis; neurocardiovascular regulation in mice 885
spironolactone; ketorolac and cold pressor pain 739
spontaneously hyperlipidaemic mice; taurine reducesSHL mice atherosclerosis 295
spontaneously hypertensive hyperlipidaemic rats; biochemical parameters of SHHR 537
spontaneously hypertensive rat
ACE inhibition/renal filtration surface area 72
cigarette smoke and muscle fibre profile 671
dual RAS inhibition in SHR 317
ketanserin stabilizes blood pressure 189
Nppa and *Nppb* genes in SHR and WKY rats 930
preweaning doxazosin and SHR blood pressure (Short Communication) 555
SR 140 333; tachykinins, 5-HT and intestinal secretion 764
SR 48 968; tachykinins, 5-HT and intestinal secretion 764
stem cells; stem cell-derived cells 900
Stephen's banded snake; neuromuscular activity of snake venoms 127
steptozotocin; *Centella asiatica* in i.c.v. streptozotocin 336
stereology; ACE inhibition/renal filtration surface area 72
sternohyoid; chronic hypoxia on contractile properties 551
strain variation; mouse perfused heart 879
streptozotocin
affinity HPLC for rat glycated haemoglobin 752
effect of *C. indica* on collagen in diabetes 157
streptozotocin-diabetic rats; μ-opioid receptor and glucose in diabetes 734
stress; swimming stress increases non-endothelial NO 951
stroke; effect of Wakame on the development of stroke 44
stroke-prone spontaneously hypertensive rats
Angelica keiskei and lipid metabolism 284
dietary phytosterol and stroke in SHRSP 919
effect of caffeine on SHRSP striated muscle 223
effect of Wakame on the development of stroke 44
Kabosu juice precipitate lowers cholesterol 532
stress response in congenic rats 464
structure–activity; NK_2 receptors in human colon and bladder 632
subarachnoid haemorrhage; NADPH-oxidase in the cerebral circulation 855
substance P
reinnervation in SAD rats 925
tachykinins, 5-HT and intestinal secretion 764

succinate dehydrogenase activity; cigarette smoke and muscle fibre profile 671
superoxide; NADPH-oxidase in the cerebral circulation 855
superoxide anion; hypoxia increases $\cdot O_2^-$ in neutrophils 659
superoxide dismutase
  NADPH-oxidase in the cerebral circulation 855
  oxygen radicals and gastric mucosal lesions 545
sustained K^+ current; increase in K^+ current by MAPK inhibitors 273
sympathetic nerve stimulation; cotransmission in dog gastroepiploic artery 678
sympathetic nervous system
  neurocardiovascular regulation in mice 885
  preweaning doxazosin and SHR blood pressure (Short Communication) 555
  stress response in congenic rats 464
sympathetic transmission; cotransmission in reserpinized vessels 452
Syrian hamster strain F1B and Bio 14.6; cardiomyopathy and sarcoplasmic reticulum 232

tachykinins; tachykinins, 5-HT and intestinal secretion 764
tachykinin receptors; tachykinins, 5-HT and intestinal secretion 764
tamoxifen; CYP-mediated hydroxylation of tamoxifen 845
taurine; taurine reducesSHL mice atherosclerosis 295
tea catechins; NO, human diseases and herbal products (Brief Review) 605
tea polyphenols; vasoconstrictor effect of catechins 88
temperature; perfusing the mouse heart 867
tetramethylpyrazine; effect of TMP on potassium channels 793
tetrandrine; NO, human diseases and herbal products (Brief Review) 605
therapy; *in vitro* effects of steroids on haemangioma 140
thyroxine-induced hypertrophy; cGMP protein kinase and myocytes 940
tiger snake venom; neuromuscular activity of snake venoms 127
tissue repair; stem cell-derived cells 900
tocolysis; tocolytic effect on pregnant rat uterus 164
α-tocopherol; effects of α-tocopherol and mannitol 745
total anti-oxidant status; *P. osteratus* improve hypercholesterolaemia 470
TR3 orphan receptor; activin and TR3 in atherogenesis 894
trabeculae; hyperosmolality and Na^+–H^+ exchange 178
trachea; DETA/NO relaxes mouse tracheal smooth muscle 709
transforming growth factor-β; activin and TR3 in atherogenesis 894
transgenic mice
  activin and TR3 in atherogenesis 894
  ANP and cardiac hypertrophy 343
  neurocardiovascular regulation in mice 885
  phenotypic analysis of transgenic mice (Brief Review) 207
translation; cardiac hypertrophy (Brief Review) 517
transplantation; heat shock proteins and cardioprotection 110
tuberculosis; Na-hyaluronate and pleural thickening (Short Communication) 203
tumour cells; anti-metastatic effect of Wf-536 *in vitro* 457
twitch contraction; effect of caffeine on SHRSP striated muscle 223

UGT *see* uridine diphosphate-glucuronosyltransferase
uncoupling of cerebral blood flow and metabolism; CBF and metabolism in a hypoperfusion model 266
unilateral subthalamotomy; experimental therapeutics of Parkinsonism 841
unsaturation index; *P. osteratus* improve hypercholesterolaemia 470
urea; renal medullary hypertonicity (Brief Review) 119
uric acid; oxygen radicals and gastric mucosal lesions 545
uridine diphosphate-glucuronosyltransferase (UGT); characteristics of UGT substrate selectivity 836

valerian; peppermint oil and valerian on the liver 799
vascular hypertrophy; dual RAS inhibition in SHR 317
vascular pathophysiology; vascular isoforms of NADPH oxidase 849
vascular physiology; vascular isoforms of NADPH oxidase 849
vascular reactivity; phenotypic analysis of transgenic mice (Brief Review) 207
vascular relaxation; NO, human diseases and herbal products (Brief Review) 605
vascular smooth muscle
  gender, sex hormones and vascular tone (Brief Review) 1
  introduction of peptides into smooth muscle 653
  vasoconstrictor effect of catechins 88
vascular smooth muscle cells
  oxLDL and Fas-mediated apoptosis 289
  vascular redox-sensitive signalling by AngII 860
vasculogenesis
  ox-LDL on progenitor cell differentiation 665
  stem cell-derived cells 900
vasodilatation; NADPH-oxidase in the cerebral circulation 855
vasopressin
  ENaC and water and salt intake in Sabra rats (Short Communication) 963
  LOX/COX and regional kidney perfusion 812
ventricle; cardiac energetics: from E_{max} to PVA 580
ventricular remodelling; ketorolac and cold pressor pain 739
volume expansion
  endothelin and obesity 702
  proANP (1–30) in hypertension 627

Wakame; effect of Wakame on the development of stroke 44
Wf-536; anti-metastatic effect of Wf-536 *in vitro* 457
white matter changes; CBF and metabolism in a hypoperfusion model 266
Wistar fatty rat; affinity HPLC for rat glycated haemoglobin 752
Wistar-Kyoto rat
  cigarette smoke and muscle fibre profile 671
  Nppa and *Nppb* genes in SHR and WKY rats 930
  stress response in congenic rats 464
Withania somnifera; effect of *Withania somnifera* in stroke 399

xanthine; tissue injury modulation in renal ischaemia 242
xanthine oxidase; oxygen radicals and gastric mucosal lesions 545
